

LODGING SERVICES

Sanitherm Water and Wastewater Services

For over 70 years, Sanitherm has provided the most reliable and cost-effective water and wastewater treatment solutions for the oil and gas and mining industries, field accommodations, remote locations and small communities. Our employees are comprehensively trained specialists in the operation of these water and wastewater treatment systems and can provide optimization solutions for your facility from startup to maintenance. We have the methods, technology and expertise to help you manage your water and wastewater treatment needs in a compliant and environmentally conscious way.

Sanitherm has been involved in the installation of more than 350 treatment systems worldwide, but we also build, install and operate package treatment plants. Our products and services are trusted by more than 15 premier manufacturers across the globe.
