

ENVIRONMENTAL SERVICES

Emergency Response Services 1.800.OIL.TANK

Emergencies can happen anywhere and anytime in facilities, on roadways or waterways. Clean Harbors is ready to safely take control of your emergency situation and make appropriate decisions that will save you time and money. Over-the-road incidents, punctured lines, tank overflows, transformers "popping", leaking drums/totes and saddle tank spills are typical responses for Clean Harbors. We handle a wide range of hazardous materials including oil, gasoline, PCBs and biological hazards.

Customers faced with sudden financial impact, system downtimes, and environmental damage know they can depend on Clean Harbors to handle their emergency needs.

Rapid Response Time, Containment and Clean up

Time is key and Clean Harbors is ready to respond quickly and effectively. Varying by the response, spills typically can be contained within the first few hours, with minimal remediation within the next 48 hours. Working under all the guidelines of local, state and federal agencies (EPA, OSHA, USCG, etc.), Clean Harbors will perform containment and begin cleanup. Waste for off-site disposal will be packaged and prepared for shipment by Clean Harbors to an approved waste treatment and disposal facility, most often that day. Manifests, bills of lading and land disposal restriction forms will be completed prior to any waste materials leaving the site. Depending on the severity of the release such as those that impact a waterway or sensitive area, Clean Harbors can also provide long-term remediation or containment maintenance.

Oil Spill Removal Organization (OSRO)

Under the U.S. Coast Guard's (OSRO) Classification Program, Clean Harbors holds Captain of the Port ratings for Facilities and Vessels in 43 ports. Our abilities include the deployment of hard boom and recovery of product on land and water (skimming, pumps, vacuum trucks). We can also store recovered product (fractionization tanks, transporters).

One Phone Number - One Call 1.800.OIL.TANK (1.800.645.8265)

With one call to 1.800.OIL.TANK from anywhere across the United States, you are connected with the Clean Harbors network of emergency response service centers. From the first call to the Certificate of Disposal, Clean Harbors has the expertise and ability to deliver a complete and secure response.
