

Transportation & Disposal

Technical Services

Technical Services

The Lambton facility serves as a depot for the company's main transportation fleet in Ontario. For over 30 years, the Lambton technical services group has focused its resources solely on the safe and efficient shipment of hazardous wastes for in- and out-of-province generators.

Like the Lambton facility, the technical services group serves a broad cross-section of industries, commercial businesses, governments, and institutions. Lambton transportation maintains a large and active fleet of power units, specialized equipment and containers and covers more than 12 million kilometres (7.5 million miles) each year.

Driver Control and Monitoring Program

Driver Selection

- 3 years experience
- Regulation 347
- Reference checks
- Annual medicals
- Brake certification
- Clean abstract
