

Vacuum Truck Services

Fact Sheet

Clean Harbors vacuum truck services supply the oilfield, drilling, industrial and environmental areas with the safest, most efficient methods of transporting, cleaning and handling of waste and product. Our vacuum trucks have the ability to haul oil or clean up a variety of products such as oil, water, sand and other forms of waste or fluid.

Oil Spill Cleanups

Clean Harbors handles spills oil and oil related products of all types on land and in water. We have resources and expertise to handle any size spill, in the plant or oilfield.

Drilling Mud Services

We service the drilling sector of the oilfield by spreading drilling mud on sites. We can also provide 24-hour service utilizing our rig shacks for our employees to live in on site. Our vacuum units come in different shapes and sizes such as tandem axle for tight leases, tri-axle for more storage capabilities, and trailer units to haul large amounts of product.

Turnaround Services

Clean Harbors vacuum trucks assist in the turnaround or shutdowns of major plants, oilfield or industrial operations. We haul waste, clean up areas, and work hand-in-hand with crews and other types of equipment.

Oilfield Services

We provide the oilfield with any day-to-day vacuum service required such as draining of high pressure lines, working with service rigs to perform mud cans, or empty rig tanks and haul the fluid away. We also work at oilfield plants and to provide services such as emptying underground tanks, tank cleaning, unloading fluid on site, and many more applications.

De-Sanding Services

Our specialized trailer vacuum units haul large amounts of fluid or waste. Working with high pressure equipment or pressure trucks, we load amounts of fluid and sand for disposal. We operate units equipped with fully opening back doors to allow sand and debris to be unloaded in pits or road spread.

FEATURES

Why use Clean Harbors Vacuum Truck Services

- Safety is our #1 priority.
- We offer a wide range of vacuum trucks in various shapes and sizes, including trailer, tandem, tri-axle, and single axle vacuum units.
- Our large fleet of vacuum trucks can serve even the biggest requests or contracts,.
- Our state-of-the-art units are maintained to the highest standards.
