

Electronic Waste Recycling

Fact Sheet

Clean Harbors offers a sustainable solution for your electronic waste whereby unwanted or unusable materials are converted into marketable materials. Electronic waste, which is managed under our zero-export policy, is dismantled into component parts. These component parts, which are managed under our zero-landfill policy, are recycled into marketable materials. The electronics recycling program at Clean Harbors serves to protect the environment and increase the rate of collection for recycling while providing clients with convenient and secure service.

Ease of Scheduling

Clean Harbors Online Services help customers manage their EH&S programs more efficiently by offering comprehensive management tools. Customers who use this complimentary service can conveniently schedule an electronic waste shipment online. If you are not an Online Service user, our representatives can easily add your unwanted electronic equipment to your order for you.

What Equipment can Clean Harbors Recycle?

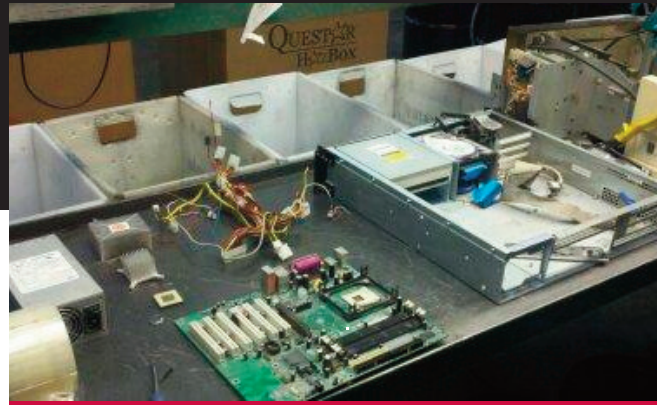

- Computer equipment, including PCs, laptops, and all peripherals
- Office equipment such as printers and fax machines
- Laboratory equipment
