

# Hurricane & Disaster Response Services

## Fact Sheet

Clean Harbors offers storm preparedness and emergency assistance during and after hurricanes and other disasters for all types of companies and organizations including manufacturing plants, utilities, marinas and marine related businesses, insurance firms, and state and federal agencies. Starting in June and ending in November when the peak threat exists, those in hurricane-prone areas can experience catastrophic losses from these natural disasters. Even companies in inland areas can experience severe damage. When time and safety are of the essence, Clean Harbors is ready to take control of your emergency situation, provide the necessary logistical support and make appropriate decisions that will save you time and money.

### Responses to All Types and Sizes of Environmental Emergencies

Releases and spills on land and in water, over-the-road incidents, punctured lines, tank overflows, leaking drums/totes, and saddle tank spills are typical responses for Clean Harbors. We handle containment area overflows and excessive storm water runoff as well as a wide range of hazardous materials including oil, gasoline, chemical, PCBs and biological hazards. On a larger scale, Clean Harbors has proven it has the resources and technical ability to handle the most unique environmental disasters.

### Rapid Response Time, Containment and Clean Up

In an emergency time is key and Clean Harbors is ready to respond quickly and effectively. Varying by the response, spills typically can be contained within the first few hours, with minimal remediation within the next 48 hours. Working under all the guidelines of local, state and federal agencies (EPA, OSHA, USCG, etc.), and working closely with national response organizations and spill management teams, Clean Harbors will perform containment and begin cleanup.

Depending on the severity of the release such as those that impact a waterway or sensitive area, Clean Harbors can also provide long-term remediation or containment maintenance.

Waste for off-site disposal will be packaged and prepared for shipment to one of over 50 Clean Harbors treatment, disposal or recycling facilities utilizing our own transportation fleet.

**One Number - One Call**  
**800.645.8265**

One call to 800.645.8265, 24 hours a day, 365 days a year will connect you to a trained Duty Operator at Clean Harbors' Emergency Operations Center in Norwell, Massachusetts.

The Duty Operator will ensure rapid response time of Clean Harbors' equipment, extensive resources and sound management for any type of environmental event you could encounter.

### Local Presence with Extensive Nationwide Resources

Clean Harbors has fully equipped local service centers throughout the south that can tap into the company's nationwide network to provide the resources and the right equipment to address any size and type of emergency. Our fleet of equipment includes vacuum trucks, air movers (carbon or stainless steel), fractionization tanks, boats, skimmers, containment boom, various pumps (diaphragm, centrifugal, etc.), Bobcats, backhoes, confined space entry equipment, drums, and containers.

### Standby Services

Clean Harbors can be on standby at a company or location in the event of an accident, release or other environmental emergency. We can quickly deploy hundreds of experienced 40-hour trained and certified workers to meet the needs of hurricane destruction or any other disaster.
