

Clean Harbors Caribe, Inc.

Environmental Services for Puerto Rico

Environmental Services for Puerto Rico

Customers in Puerto Rico requiring routine environmental services, or experience system downtimes or environmental damage from a spill or emergency, know they can depend on Clean Harbors Caribe to handle their environmental needs. Clean Harbors is ready to deploy the manpower and resources to handle any environmental situation. Our Services include:

- Waste Transportation and Disposal
- CleanPack® – Laboratory Chemical Packing
- Site Services
- Emergency Response
- Apollo Onsite Services Program

Waste Transportation and Disposal – With an unmatched infrastructure of 49 waste management facilities, including nine landfills, six incineration locations and six wastewater treatment centers, we offer incineration, water treatment, landfill, recycling and reuse, fuel blending, lab chemical disposal, used oil and oil products recycling, PCB disposal, and explosives management.

CleanPack® – Laboratory Chemical Packing – Clean Harbors' staff of professionally trained CleanPack chemists collect, label and package your lab pack wastes in compliance

with local, commonwealth, and federal regulations. All lab pack waste can be removed from the site the day it is packaged, unless prohibited by law.

We also provide household hazardous waste collections, reactive material services, cylinder and compressed gas management, laboratory move and facility closure services.

Site Services – Working in hazardous and non-hazardous environments, crews perform routine planned jobs and emergency responses specializing in site decontamination, product recovery and transfer, tank cleaning, demolition, excavation and removal, vacuum services, industrial services and maintenance, marine services and booming, and remediation and environmental construction services.

Rapid Emergency Response – When time is critical, Clean Harbors is ready to respond quickly and effectively to any emergency including spills of all sizes on land or water, chemical, oil or other hazardous material. Working under all the guidelines of local, commonwealth and federal agencies (EQB, EPA, USCG, etc.), Clean Harbors will perform containment and begin cleanup. We also provide hurricane and storm assistance.

Under the U.S. Coast Guard's (OSRO) Classification Program, Clean Harbors holds Captain of the Port ratings for Facilities and Vessels in the port of San Juan. Throughout Puerto Rico we have the ability to deploy hard boom and recover product on land and water.

Apollo Onsite Services Program – Clean Harbors' Apollo program places skilled technicians onsite to work in tandem with customers to deliver proper waste transportation and disposal, lab chemical packing, industrial cleaning and maintenance, and more. Whether a customer requires a single field technician or a multi-person team of diversified experience, Clean Harbors can design the right program to satisfy their specific needs.

Summary of Clean Harbors Caribe – Clean Harbors is a recognized leader in environmental services. Our expertise and ability to respond provide a complete, secure and cost-effective solution to your environmental needs.
